Workshop Building Bridges: how the healthcare & research community can help build the European Health Data Space

BioMed Alliance workshop focusing on how we can make the European Health Data Space a reality, by building on existing initiatives and working with the health community & medical societies to strengthen the primary and secondary use of data. Stakeholders have much to offer and gain from EHDS, and during the workshop we will explore with different speakers from the field how the health community should be preparing, and can contribute to the implementation.

This workshop is supported by the EU4Health Operating Grant EXHALE, funded under grant agreement nr. 101176496
